

Autorola Solutions supporting short-term rental and mobility companies all over the world

As the industry rapidly evolves, short-term rental and fleet mobility trends are reshaping the way your business operates. Digital platforms are essential for fleet owners to keep pace with changing market demands and to maximize business potential.

Why choose Fleet Monitor?

Autorola's Fleet Monitor offers a comprehensive suite of solutions designed specifically for short-term rental and mobility fleet owners. Our platform streamlines the entire process, from vehicle sourcing to disposal, ensuring a seamless and efficient experience at every stage and is your customized and personalized access to manage all your activities.

In short

It is scalable, secure and easy to get started with Fleet Monitor and with our API you seamlessly connect diverse systems internally and externally in a secure way to automate your digital landscape.

Fleet Monitor lets you put people, processes and technology together in one platform.

Market trends

Shared Mobility

The rise of shared mobility services requires fleet owners to adapt to on-demand rental models, offering flexibility and convenience to customers.

Electric VehiMobicles (EV's)

The growing adoption of EVs in fleets necessitates management systems to optimize charging schedules and maintenance.

Data Driven Insights

Leveraging data analytics enables you to identify trends, forecast demand, and adjust operations for optimal efficiency.

Embrace the future of fleet management with Fleet Control, the digital platform that empowers you to stay ahead of mobility trends and unlock new opportunities for growth. Elevate your business with our innovative solutions and achieve success in the dynamic world of short-term rentals.

With our platform

With the Fleet Monitor you always stay ahead in your planning and deliver the best customer service to your drivers when they change cars.

Because Fleet Monitor is configurable it grows with your business: Add new functions and features, introduce new work flows and interfaces, redesign your operations to support your strategy.

In short, upscale your business, when you want it, how you want it, and our experienced team offers expert consultancy to optimize your business and processes.

Resource efficiency

Free up your time and resources with automated processes and streamlined workflows.

Maximize Profitability

Make data-driven decisions to optimize your fleet's performance and profitability.

Hassle-Free Management

Stay in control of your fleet with user-friendly tools and comprehensive monitoring.

Your wins

We add measurable value to your business by providing Solutions in the form of systems and services. Our long-standing capabilities and experience within software and automotive help you gain significant benefits, among others these are:

Comprehensive Monitoring

Gain full visibility and control over your entire fleet, from the moment of acquisition to the final sale. Monitor each vehicle's journey, track maintenance, and receive real-time updates.

Automated Workflows

Simplify and automate tasks such as check-ins, check-outs, and maintenance schedules. This allows you to focus on maximizing profitability and delivering exceptional customer service.

Integrated Systems

Seamlessly connect with suppliers and partners to coordinate inspections, damage assessments, and market price valuations. Access a broad range of services to handle the sale of vehicles both nationally and internationally.

Customizable Workflows

Tailor Fleet Control to match your unique business needs. Delegate tasks and responsibilities to your team members and partners, creating a flexible and collaborative environment.

Transparency and Control

Experience complete transparency throughout the value chain, enabling you to manage your assets with confidence. Leverage our centralized system to make informed decisions and stay on top of your fleet operations.
