

Autorola Solutions supporting Dealer and Dealer Groups all over the world

Autorola Solutions offer a highly customizable range of products that are specifically designed to improve dealers' day-to-day operations as well as trade-in and sales processes, both to wholesale and retail customers in the dealer industry.

In other words, Fleet Monitor supports dealers of all sizes all over the world to gain full control and transparency across their business - both at national and regional level across dealer groups and outlets.

Our core competencies are providing full service solutions to align trade-in inspections and provide valuations based on dynamic intelligent market pricing for dealers to calculate margins, control their stock and continuously evaluate their sales strategies to optimize performance under ever-changing market conditions.

Fleet Monitor works seamlessly with other Autorola integrated systems to support all workflows and processes, from managing tasks with suppliers, e.g. receipt of vehicle, inspection and damage assessment to market price valuations and sales handling of vehicles in the most attractive marketplace, whether vehicles are sold nationally or offered internationally — our services provide full flexibility from one place!

In short, centrality and 100% transparency in Autorola Solutions systems give dealers control of the full value-chain, while providing flexible options to delegate and build specific workflows around core business and collaboration partners and suppliers. We make it as resource-freeing and hassle-free as possible.

Global online vehicle remarketing and business intelligence partner

From optimizing vehicle workflows and inventory to remarketing — We have you covered

We aim to

Provide you complete customer satisfaction on a very personal level. All Autorola Solutions projects are assigned a Project Manager who oversees the entire implementation process — from the initial contact through to handover. Our consultants are dedicated to creating a solution to meet all your individual needs.

Gain Full Control

Fleet Monitor provides banks with real-time monitoring of their assets, ensuring up-to-date information on each vehicle's location, condition, and usage. This aids in accurate and timely reporting, helping banks meet regulatory requirements.

Go Lean

With a user-friendly and intuitive look and feel, the system is built around dashboards and work-lists, informing users on which vehicles to take action.

Communicate

Fleet Monitor and Order Monitor allow for efficient and transparent communication with your service providers.
